Legal Metrology applies to any application of metrology that is subjected to national laws or regulations.
There will be mandatory and legal bindings on the units and methods of measurements and measuring
instruments. The scope of legal metrology may vary considerably from one country to another.

Metrology is defined by the International Bureau of Weights and Measures (BIPM) as "the science of
measurement, embracing both experimental and theoretical determinations at any level of uncertainty in any
field of science and technology." [4] The ontology and international vocabulary of metrology (VIM) is
maintained by the Joint Committee for Guides in Metrology (JCGM), a group made up of ...
